ACHIEVEMENTS

- Conference Poster - Anti-Cancer Potential of Nigella sativa, IPGA 37th Annual Conference
- Top 2% Globally, TryHackMe

PROFILE

I am a pharmacy student at AKTU, Lucknow, who builds things alongside the degree - security tooling, web apps, and tools at the intersection of tech and healthcare. Days split between pharmacokinetics and writing PHP or Go; evenings go to CTFs, currently top 2% on TryHackMe. Still a work in progress, which is where I want to be.

PROJECTS

- Php-router, Zero Trust PHP router with signed URLs, bot detection, and rate limiting.
- Drxstore, Lightweight pharmacy management system with portals for admin, staff, suppliers, and customers.
- Syniq, CLI tool that converts natural language into safe, auditable Linux shell commands via an LLM backend.
- Lexivault, Single-file vocabulary app with spaced repetition and a minimal API.
- Dosage Calculator, Pharmaceutical dosing tool accounting for weight, renal function, and route of administration.
- BMI Tool, Interactive BMI calculator with classification and basic health insights.
- Chemical Concentration Calc, Molarity, normality, and dilution calculator built for lab use.
- Scientific Calculator, Full-featured calculator with logarithmic, trigonometric, and exponential operations.
- Glycotrack, Personal Diabetic Record Management System.
- Cipherjournal, A production-quality, single-file PHP web application for documenting your cybersecurity learning journey.
- Vaultmark, A single-file PHP vault for the links you can't afford to lose.
- Vigilon, A single-file Linux system monitoring dashboard built with Flask and psutil.
- Homelink, Secure remote access to your home machine - no static IP, no VPS, no monthly cost.
- CipherForge, Cyber Swiss Army Knife - a single-file PHP tool for encoding, hashing, encryption, text processing and data forensics.
- GhostShift, Network Identity Management Toolkit.
- Orbit, A zero-dependency Python tool that fetches AI news from 13 RSS feeds, scores and deduplicates articles.
- Academic-Tools-Games, A clean, interactive web-based collection of academic tools and educational games.
- Document-viewer, A modern web-based document viewer supporting PDF, Office, and OpenDocument formats.
- Web-directory-search, A secure PHP-based web data directory system with authentication, CSRF protection, rate limiting, and integrated document viewer.
- Secure-otp-image-viewer, A secure PHP-based image viewer with one-time password access, session expiry, and activity logging.
- BatchMail-Cert, A Python automation tool for bulk sending personalized certificates via email.
- FlexiMatch-XL, A flexible Python utility to match and validate values between Excel and CSV datasets.
- CertiForge-Auto, A Python automation tool to generate personalized bulk certificates from HTML data.

EDUCATION

- Bachelor of Pharmacy (Expected in August 2028) - AKTU Lucknow
- Higher Secondary Class XII Physics, Chemistry, Biology (2024) Raghuvanshpuram
- High School Class X General Science (2022) Raghuvanshpuram

CERTIFICATES

- Hacker Holidays - Byte Lotus, TryHackMe
- Cyber Security 101, TryHackMe
- Pre Security, TryHackMe
- Microsoft Copilot: Prompt Writing, LinkedIn
- Practical GitHub Actions, LinkedIn
- Generative AI, Google Cloud
